can do basic stuff
- Jira
good level
- Claude Code
prototypes and websites

SOFT SKILLS

- Well-organized
- Analytical thinking
- Attention to detail
- Problem-solving
- Teamwork

LANGUAGES

- Polish - native
- English - B2

About me

I started my journey in IT as a System Analyst and later moved into UX/UI design, combining analytical thinking with a strong sense of structure and visual clarity.

I have been working as a UX/UI Designer since late 2023, focusing on simplifying flows, organizing information, and creating clear, user-friendly interfaces. At Kaczmarek Group, I also had the opportunity to help build UX/UI awareness within the organization and support a more thoughtful approach to product design.

Experience

KACZMAREK GROUP

UX/UI DESIGNER | July 2025 - now

JUNIOR UX/UI DESIGNER | October 2023 - June 2025

JUNIOR SYSTEM ANALYST | July 2022 - September 2023

I joined Kaczmarek Group as a Junior System Analyst, working on system documentation, component communication, and UML diagrams. Over time, I gradually moved into UX/UI design, helping introduce a more structured design approach within the organization.

As a UX/UI Designer, I worked on B2B customer panels for a business information exchange platform. These were complex legacy products, so my work focused on simplifying flows, redesigning interfaces, organizing information, and improving visual consistency.

I also supported other web and mobile projects, collaborating with PMs, POs, developers, marketing teams and graphic designers.

COMARCH

IT SYSTEM ANALYST | July 2021 - June 2022

I worked on collecting client requirements, maintaining system documentation, and modeling processes in Enterprise Architect, while supporting communication between business and technical stakeholders.
